

Satallite radio enables me and my family to enjoy the radio content as we see fit without being forced to listen through useless advertising. Air radio provided weather and traffic coverage is usually 80% ads and 20% content. When I need to know about either, it's well worth my dollar to be able to get it when I need it rather than as part of a normally scheduled broadcast that is, at best, every half hour or so.

Please reject NAB's petition 04-160.

Thanks
